

Control - Visualization & PLC

Visualization

Corr24 introduced a new visualization for corrugating machines in 2022. The new system is based on the design of the most modern high-speed machines. With this you are able to implement the same ergonomic machine operation and features.

PLC

Depending on the model the plc can be upgraded with Siemens or VIPA S7, TIA or Allen-Bradley.

Benefits

- Secured spare parts supply
- Reduced downtime risk
- Full service support
- Service via remote service possible
- Reduced spare parts costs
